Batch homogenizing plant commissioned at Aluminiumwerk Unna AG

Hertwich Engineering GmbH, Austria, has successfully commissioned a new batch type billet homogenizing plant for heat treatment of aluminum alloys for the automotive and aircraft industry at Aluminiumwerk Unna AG, Germany.

This furnace operates with lean energy consumption and very accurate temperature control is achieved for both, log and air temperatures (holding temperature +3 °C).

Careful heating of logs with low heat head during fast heating, is achieved by continuous temperature measurement at the hottest and coldest area.

Plant operation is largely automated.

Hertwich Engineering GmbH forms part of the Tube, Long Product and Forging Technology Business Area of the SMS group.
