### Order from Russia for SMS Meer GmbH

#### **JSC 'Siajar' orders axial closed-die rolling machine**

The trading organization of the Russian republic of Mordovia, JSC 'Siajar', with head office in Saransk, has placed an order with SMS Meer, Witten, Germany, to supply an AGW 200 E axial closed-die rolling machine.

The AGW 200 E axial closed-die rolling machine will be used at a forging shop still to be decided in the region around Volga and Don to produce near-net-shape blanks, such as e. g. welding flanges, spur gears for gearbox construction and axially splined discs. The materials to be rolled are predominantly general structural steels, but one acid-resistant steel material – from which the welding flanges are made – and aluminum alloys are also to be formed.

Delivery of the AGW is scheduled for July 2008.
