EQUIPMENT CHECKS

Progress through knowledge

OBJECTIVE ASSESSMENT

Regular checks and inspections are fundamental in safeguarding the availability and economy of your machine. The SMS Meer Service Experts have therefore developed specific equipment checks for carrying out a technical check of selected core components, your machine or of the entire facility.

The SMS Meer Equipment Checks – in the form of pre-defined checklists – provide an objective assessment of the machine status and highlight potential for improvement. SMS Meer relies here on pioneering measuring technologies and processes. In this way, for example, we are able to achieve convincing measurement results even in very short downtimes. The implementation of the check is, of course, agreed with you on an individual basis.

WHAT WE OFFER

- Technical machine inspection based on a defined scope
- Concrete recommendations for action in order to avoid unplanned outages
- Recommendations for optimising your machine
- Archiving your machine's data to map its history

HOW YOU BENEFIT

- Knowledge of the status of your machine
- Reduction in cost and time-intensive consequential damage
- Improvement in the planning of spare parts requirements
- Decision-making platform for planned maintenance and/or optimisation measures
- Safeguarding the value of your facility
- Comparison with identical facilities

WHAT WE RECOMMEND

In order to attain the most precise and comparable evaluation possible on the status of the machine or facility, the equipment check should be carried out at regular intervals. We will gladly provide you with advice on the machine-specific intervals.

CHOOSE SMS MEER SERVICE

- Manufacturer's know-how in design, technology and maintenance
- Knowledge of the latest technical innovations
- Spare parts service from the original manufacturer

Any requests or queries? We look forward to hearing from you!
