SERVICE worldwide

MAINTENANCE AND REPAIR KIT

Package deals full of benefits

6" & 8" ROLLING MILL CASSETTES

Do you wish to make an efficient and economical overhaul of your rolling mill cassettes? If so, SMS Meer has some ideal package deals for you. Complete and ready for use and perfectly tailored to your cassette. The SMS Meer maintenance and repair kits are an intelligent OEM solution for assisting the planning, organisation and implementation of your overhaul.

In order to install the cassettes on your wire rod block it is usually necessary to assemble several different components in the installation preparation area. Not with SMS Meer: You receive a kit, specially tailored to your plant and with only one part number. One purchase order – everything from a single source.

YOUR ADVANTAGES

With our maintenance and repair kits, you can thus ensure the efficiency and precision of your plant in an economical and lasting manner:

- Specially compiled kits
- Packing unit with all components required by you for overhauling the cassettes
- Maximum reliability on site: easy to find and ready to use
- One part number: lower process costs and optimised incoming goods times

MAINTENANCE KIT

comprising:

- Antifriction bearings for roll shafts
- Plain bearing pairs
- Double lip seals
- Sliding rings, inside and outside
- Fitting plates
- Locknuts
- Self-locking screws
- Elastic discs

REPAIR KIT

Extends the maintenance kit as follows:

- Seal carrier plate
- Shifting system incl. adjusting screws and antifriction bearings
- Roll shafts

GENERAL OVERHAUL

Extends the repair kit as follows:

- Front panel, incl. mechanical adaptation

SMS MEER OEM SPARE PARTS MORE RELIABLE, MORE DURABLE, MORE INNOVATIVE

Wherever plant components have to withstand maximum loads on a permanent basis, there is only one thing that counts: the original quality provided by the manufacturer. The OEM spare parts from SMS Meer offer you safety and reliability that pays off. Not only do they last longer, but their design is also optimised constantly according to the latest state of the art. We provide you with extensive and competent advice on how you can ensure your plant availability on a lasting basis for the future. And we can do this for you directly on site if you wish.
